SUMMARY

Full Stack Developer with 1.5+ years of experience building and shipping production web platforms in healthcare, fintech and real-time AI. Works end to end with Next.js, React, Django, FastAPI and Node.js, from LLM features on AWS Bedrock to containerized deployments on AWS and Google Cloud. Experienced with real-time systems (SSE, WebSockets, WebRTC), third-party integrations (payments, KYC, WhatsApp, video calls) and secure cloud setups with no stored credentials.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, Java, SQL, Dart
- **Backend:** Django, Django REST Framework, FastAPI, Node.js, Express, SQLAlchemy, Alembic, Celery, Redis, REST APIs, WebSockets, Server-Sent Events (SSE), JWT, OAuth 2.0 (Google Sign-In)
- **Frontend & Mobile:** React, Next.js (App Router), Angular, Tailwind CSS, Framer Motion, GSAP, Flutter
- **Cloud & DevOps:** AWS (EC2, S3, SES, RDS, Bedrock, IAM, Systems Manager), GCP (Compute Engine, Cloud Run), Docker, Docker Compose, Nginx, Cloudflare, PM2, GitHub Actions, Linux
- **Databases:** PostgreSQL (AWS RDS, Neon), SQLite, Oracle SQL
- **AI & ML:** LLM integration (AWS Bedrock, Gemini, Groq), structured JSON outputs, OCR (Tesseract), MediaPipe, TensorFlow/Keras
- **Integrations:** Agora RTC, WebRTC, Twilio, WhatsApp Cloud API, Razorpay, Decentro (KYC and credit bureau), Google APIs
- **Testing:** pytest, Playwright

EXPERIENCE

Software Developer | Dewdas Technology Pvt. Ltd.

Mar 2026 – Present

- Built and maintain a **clinical EMR and telemedicine platform** used in production by an allergy and Ayurveda clinic, using Next.js, TypeScript, Django REST Framework, PostgreSQL, Celery and Redis.
- Added AI features on AWS Bedrock: a patient intake chat, clinical (SOAP) summaries and an Ayurvedic assessment engine that returns schema-validated JSON.
- Developed a real-time doctor waiting queue over SSE, Agora video consultations with cloud recording, server-side OCR for lab reports, digital prescriptions, WhatsApp Cloud API notifications and a Razorpay pharmacy store with shipment tracking.
- Deployed on AWS without stored credentials: EC2 behind Nginx and Cloudflare WAF, private RDS, S3 with short-lived pre-signed URLs, SES with automated bounce handling, and server access only through Systems Manager; shipped with Docker Compose and GitHub Actions CI.
- Built a **loan eligibility platform** with FastAPI, async SQLAlchemy and Next.js: lender matching, a 0–100 readiness score, FOIR/EMI calculations, a what-if simulator, PDF reports, and KYC and credit bureau checks through Decentro.
- Built a **clinical fitness platform** (Next.js, FastAPI, Celery): client and doctor portals, MediaPipe pose analysis for exercise form, AI review of meal photos, expiring WhatsApp workout links and lab report tracking.

- Planned sprint tasks and reviewed pull requests for a team of interns and developers.

Full Stack Developer | EarthMinorRights AI Labs Pvt. Ltd.

Sep 2025 – Feb 2026

- Built **VoiceGuardian**, an AI voice moderation platform that transcribes calls, scores toxicity with Perspective API and rephrases messages with a Groq LLM, across browser (Twilio, Django Channels), peer-to-peer (WebRTC) and Flutter mobile (Agora) clients on a FastAPI backend. Code: github.com/nidhinvijay/voice_guard, github.com/nidhinvijay/voiceguardian, github.com/nidhinvijay/voiceguardian_app
- Engineered paper and live algorithmic trading systems processing 100+ symbol updates per second with Node.js, Angular and Socket.IO, using a state machine to validate paper P&L before any live order. Code: github.com/nidhinvijay/BTCUSDT, github.com/nidhinvijay/Zerodha
- Deployed the trading applications on Google Cloud VMs with PM2 and Cloudflare.

Python Full Stack Developer Intern | Srishti Innovative Technopark

Feb 2025 – Aug 2025

- Developed **BookHub**, a Django library management system with a multi-stage Razorpay payment lifecycle and cached Google Books API data. Live: bookhub-if2m.onrender.com | Code: github.com/nidhinvijay/BookHub
- Built an **AI Interview Bot** with React, Django and the Gemini API: PDF resume parsing, tailored question generation and real-time facial emotion detection (TensorFlow/Keras, OpenCV). Code: github.com/nidhinvijay/AI_Interview_Bot

PROJECTS

- **HR AI Agent** (Django, Gemini API, Google Calendar API): screens and ranks resumes and schedules interviews for shortlisted candidates. github.com/nidhinvijay/hr-ai-agent
- **Textlytics** (Django REST Framework, Celery, Redis, PostgreSQL, Docker): text analysis API with full-text search on GIN indexes. github.com/nidhinvijay/textlytics

EDUCATION

Master of Computer Applications (MCA) | University of Kerala | Graduated July 2025

CERTIFICATIONS

- Data Analysis with Python (2025)
- Machine Learning with Python (2024)
